

A scatter plot showing the relationship between Ozone (x-axis) and another variable (y-axis). The x-axis is labeled 'Ozone' and ranges from 0 to 150. The y-axis is unlabeled but has a scale from 0 to 10. The plot shows a dense cluster of points at low Ozone values (0-50) and low y-values (0-5). There are several points at higher Ozone values (50-100) and higher y-values (5-10). The overall trend suggests a positive correlation between Ozone and the y-axis variable.
