

A scatter plot showing the relationship between Ozone (x-axis) and an unlabeled y-axis variable. The x-axis ranges from 0 to 150, and the y-axis ranges from 0 to 100. The data points are black dots. There is a dense cluster of points at low Ozone values (0-50) and low y-values (0-50). A second, more elongated cluster of points is located at higher Ozone values (50-100) and higher y-values (50-100). A few isolated points are scattered at higher Ozone values (100-150) and lower y-values (0-50).
