

A scatter plot showing the relationship between Ozone (x-axis) and an unlabeled y-axis variable. The x-axis ranges from 0 to 150, with major ticks at 0, 50, 100, and 150. The y-axis ranges from 0 to 100, with major ticks at 0, 20, 40, 60, 80, and 100. The data points are black dots. There is a dense cluster of points at low Ozone values (0-50) and low y-axis values (0-40). A second, more elongated cluster of points is located at higher Ozone values (50-100) and higher y-axis values (40-80). A few isolated points are scattered at higher Ozone values (100-150) and lower y-axis values (0-20).
